Academia meets Industry

A Political-Scientific Discussion

Dr. Axel Wiest serves as VP, R&D Strategy & Planning at Bristol Myers Squibb. His prior roles and responsibilities include SVP, R&D Strategy and Business Operations and COO R&D at Merck Healthcare KGaA/EMD Serono (2014-2019); VP, Strategy and Project Management at Boehringer Ingelheim Biopharmaceuticals (2009-2013); and EVP/COO at Fresenius Biotech GmbH and President of Fresenius Biotech North America Inc. (2002-2009). Prior he served as a management consultant at A.T. Kearney, as a resident physician in Germany and Colombia, and as a consultant for WHO. He holds an M.D./Ph.D. from the University of Freiburg and Heidelberg and the German Cancer Research Center as well as a Master of Public Health from the Johns Hopkins School of Public Health.

The seminar series “Academia meets Industry” aims at stimulating interdisciplinary discussions between university members and high profile managers from industry and public health organizations. It addresses the complex challenges in science, management, politics and society which are promoted by both university and industry in a concerted action. At these seminars the practical perspective of the guest speakers encounters the education and research priorities of the university and thus allows an unprecedented dialogue on chances and risks of current and future research developments in life sciences.
